

The City of Washington purchased the Mr. Manhole System in 2009 and we have completed nearly 80 manhole repairs using the tools. The crew loves the labor and time savings that the Mr. Manhole tools provide and the residents enjoy the smooth transition between the manholes and the roadway. The Mr. Manhole System has worked great and we like the I&I savings too. The tools have helped the City of Washington provide a better manhole repair system.
